2nd Generation Dealership Celebrates 50-Year Milestone

Williston, VT – CRW Corp. celebrates their 50th anniversary in the construction industry. Now operated by the second generation, the company is looking back on 50 years as a family-owned business specializing in providing construction equipment solutions to their customer/partners since 1961.

CRW Corp. opened its doors as Wood's Construction Equipment and Supplies in South Burlington, VT, in 1961. Charles R. "Bob" Wood, Sr., founded the company as a general line equipment house providing contractors with heavy construction equipment, supplies, parts and service. The company, now owned and operated, by his sons, Chris Palmer and Bobby Wood, has weathered the many ups and downs of the construction industry for the past five decades.

Since its inception in 1961, CRW Corp. opened a branch office in Worcester, MA (1998), built a new state of the art headquarters facility in Williston, VT (2000), and a second branch office in Syracuse, NY (2004). Today the dealership provides equipment solutions for customers primarily located in Vermont, New England, New York and Eastern Canada. Used equipment is sold worldwide. CRW Corp. is an authorized distributor for Link-Belt Cranes, Volvo Construction Equipment, Terex-ASV, National Cranes, Tadano boom trucks, Genie/Terex telehandlers and Shuttlelift industrial cranes.

"Our longevity in this industry is a tribute to our founder's vision of building long-term relationships with our customer **Partners**; providing them with the best equipment **Solutions** available based on their needs, with the goal of assisting them with their **Success**" quoted Chris Palmer, President of CRW

Corp. “Even with the wide spread use of technology; our industry is still a people and relationship business. We have always tried to hire the best people, train them, and keep them. Our customers still want to do business with people they can trust for sound advice and that will be around to take care of them when they have a problem. We feel very fortunate to have been doing that successfully for the last fifty years and we have every intention of continuing that tradition for the next fifty.”
